# Integrated Headset for EXO 900 Helmet

\$50.00

The 65EX Line of integrated helmet headsets from iMC features all the components necessary to set up the Scorpion EXO 900 for use with the Honda Goldwing, Harley Davidson Ultra Classic, 2 Way Radio, 3.5mm audio or 3.5mm phone. The kit includes two hi-fi flat panel speakers that fit perfectly into the speaker recesses in the EXO 900. Also included is the iMC noise cancelling microphone (except 265EX), as well as lower cable to plug into the audio system headset port for your application.

Also included is a pre-drilled communications door, which allows for discrete installation of the speaker and microphone wiring. Never, has installing a helmet headset looked so good!

### Features

- Directional noise cancelling boom microphone reduces ambient noise for crisp communication.
- No helmet modifications required for installation, boom microphone works well with all types of helmets. (Installs via Velcro underneath the cheek pad)
- Flat panel speakers provide with metal casings provide great range of sound for music and loud, clear audio for intercom.
- Superior quality, the product is backed by a two year warranty.

### What's in the box

- 2- Detachable stereo speaker drivers
- 4 - Velcro speaker enclosures
- 1 " Flexible boom microphone with Velcro mounting materials
- 1- Threaded speaker/microphone wiring plug with female firewire connector.
- 1 " Lower coiled cord with male firewire connector (differs on application)
- 1 " Pre drilled communications door

### Installation Notes:

**For optimal sound quality the speakers should be aligned with your ear canals and also touching your ears.**

**The microphone should be close to your lips with the white dot facing your mouth.**

**The fire-wire connection can be tucked into the helmet when not in use.**
