BTS 200 Partner Set

\$269.95

The iMC Camos BTS 200 Bluetooth® partner set is a complete rider to passenger communication system. BTS 200 headsets boast impressive features, including support for 3 simultaneous connections. Each rider can wirelessly connect to stereo music, intercom, and your cell phone all at once! Channel 1 supports both A2DP (Wireless Stereo) as well as the headset profile (Cell Phone, GPS, 2 Way Radio) with interrupt priority. Channel 2 adds the option for full duplex wireless intercom (intercom will interrupt stereo music for crystal clear communication), so you can talk to your passenger with no wires or bulky equipment.

The partner set package includes everything needed for 2 helmets. New software allows the intercom to be always on mode so there is no voice activation to worry about.

The IMC Camos BTS 200 builds on the success of the BHS 600 by adding an improved case design, larger buttons and improved headset design. Pairing is also much easier with setup taking only seconds. Addition of a large mute button makes it easy to pause music when conditions call for silence.

Features:

- Bluetooth® 2.0 technology for highest quality stereo audio
- Wireless rider to passenger to intercom.
- Choose between voice activation or push button activation for intercom.
- High quality slim fit stereo speakers (6mm in depth, 36mm circumference)
- Large mute button for increased safety
- Waterproof case
- Full face (soft wire) microphone and boom microphone provide unmatched noise cancellation.
- Easy mounting via clip on mounting system or double sided tape mount fits to any helmet. The Bluetooth module can easily be transferred between helmets.
- Full duplex wireless intercom
- Micro USB headset connector allows easy transfer between headsets.
- Up to 12 hours battery life with 180 hours standby
- Backed by 2 year replacement warranty.
